

Your Voice Counts Summary

“Your Voice Counts” project let the public tell us of their experiences of accessing mental health services and how it can be improved.

North East Hampshire & Farnham CCG asked Healthwatch Hampshire to talk to people about their experiences

We spoke to people with a learning disability and/or autism, adults, young people & people with dementia

We got our feedback by focus groups, engagement events, conversations and polls reaching all towns in the area

We spoke to 739 people, attended 31 events and worked with 54 organisations!

Key themes include communication, access to long term preventive services & signposting- and having a choice.
